INTRODUCTION

WE ARE AN INDUSTRY LEADER

PAI Pharma is a leading, US-based, fully integrated specialty pharmaceutical company dedicated to delivering high quality oral liquid medications. With the most extensive range of liquid medications (in bottles and unit-dose cups) in the USA, our portfolio includes both prescription (Rx) and over-the-counter (OTC) products for retail pharmacies, hospitals, and long-term care facilities.

Visit us at PAIPharma.com to learn more.

Extensive Inventory & Safety Stock

Expansive Unit-Dose Portfolio

Largest Gx-liquid Capacity in the United States

PAI PRODUCT BARCODES

BARCODE GUIDE

Before beginning to test your scanner for barcode reading ability, please ensure that your scanner's hardware and software has been updated to read the GS1-128 Databar Linear and 2D Datamatrix code.

TEST YOUR SCANNER

If your scanner does not display any numbers or fails to beep, contact your scanner supplier. Your scanner is not enabled to read the GS1-128 Databar Linear or the 2D Datamatrix barcode symbol.

Scan the images below to test your scanner:

(01) 00301210873164

The scanner display should show:
0100301210873164

The scanner display should show:
0100301210873164211234567890121721063010AB12

NO PRODUCT FOUND!

If the scanner has been enabled to read GS1-128 Databar Linear, and the product does not appear in the database when it is scanned, contact your scanner supplier, pharmacy informatics team, or IT department to troubleshoot.

BARCODE QUALITY

Potential packaging defects:

- Smeared
- Smudged
- Faded
- Crosses the perforation

For questions about how to purchase or any other information on products, call your PAI sales representative or contact customer service at 864-331-1832 or info@paipharma.com.

THE BARCODE SYMBOLS

Case 2D	Carton	Bottle	Cup
GS1 Datamatrix	GS1 Datamatrix	GS1 Datamatrix	GS1-128 Linear

WHAT IS A GTIN?

GTIN is an acronym for Global Trade Identification Number and is a 14-digit number. The GS1 assigns a prefix to a registered company which is used to create an item number. For drug products, the prefix includes the FDA-assigned labeler code:

GS1 Prefix GS1	NDC Labeler Code
030121	0121

If your product database does not allow the storage of the 14-digit GTIN, programming will be required by your product data provider to extract the NDC or PAI ID from the GTIN. The format of the three-segmented numbers are as follows:

10-Digit NDC	11-Digit NDC
4-4-2	5-4-2

WHAT DOES THE DATA REFERENCE?

The encoded data follows GS1/HDA specifications. There are two-digit Application Identifiers (AIs) that will help GS1-128 compliant systems identify the information being read. PAI uses the following AI codes:

GTIN (14-digit)	**Serial Number** (12 digits)	**Expiration Date** (YYMMDD)	**Lot Number** (4 digits)
01	21	17	10
