WHAT IS A GTIN?

GTIN is an acronym for Global Trade Identification Number and is a 14-digit number. The GS1 assigns a prefix to a registered company which is used to create an item number. For drug products, the prefix includes the FDA-assigned labeler code:

GS1 Prefix GS1	NDC Labeler Code
030121	0121

If your product database does not allow the storage of the 14-digit GTIN, programming will be required by your product data provider to extract the NDC or PAI ID from the GTIN. The format of the three-segmented numbers are as follows:

10-Digit NDC	11-Digit NDC
4-4-2	5-4-2

WHAT DOES THE DATA REFERENCE?
